Profile

I'm a fresh Computer Science graduate with a focus on web development, I have good knowledge in HTML, CSS, JavaScript, and Bootstrap. I have a proven track record of successful project execution and previous experience in web development. I am experienced in the entire web development process, including design, development, and deployment. Eager to leverage my skills in a challenging Frontend Developer position within a dynamic company, I am committed to benefiting the company and expanding my skill set by learning React. I have a keen interest in continuous learning and improvement, and I am dedicated to using my knowledge to contribute positively to my future workplace.

Projects

Boss Helper - Website and Web Application

Designed and developed responsive website and web application using HTML, CSS, and JavaScript to provide a versatile business management solution.

• **Key Contributions:**

- Utilized local storage to store employee data, product information, and user credentials for Sign In and Sign Up functionalities.

- Implemented user-friendly interface with intuitive navigation for seamless user experience.
 - Created informative sections such as About, Founder, and FAQ to enhance user engagement.
 - Developed essential functionalities including user authentication (Sign In and Sign Up) for accessibility.
 - Dedicated effort to ensure visually appealing design and engaging content, surpassing typical website standards.
- **Technologies Used:** HTML, CSS, JavaScript.
 - **Current Status:** Project is in the final stages of development, nearly completed and ready for launch.

Shopper

Responsive E-commerce website with HTML, CSS, and Bootstrap, guaranteeing accessibility across devices and featuring a visually appealing layout..

Taveler

Responsive tourism company website with HTML, CSS, and Bootstrap.

Omnifood

Responsive restaurant Landing page using HTML and CSS .

Tasty

Responsive restaurant Landing page using HTML and CSS .

Daniels

Responsive portfolio website using HTML, CSS, and Bootstrap.

Guesser

Created an engaging web-based number guessing game with HTML, CSS, Bootstrap, and JavaScript, challenging players to guess a random number (1-20) with real-time feedback, while tracking scores and high scores for friendly competition.

DiceWar

An interactive dice game, created with HTML, CSS, Bootstrap, and JavaScript, where two players take turns rolling dice to accumulate scores. The game features switching between players, scoring rules, and a visually appealing responsive interface, with the first to reach 100 points declared the winner.
